INSTRUCTION TO AUTHORS

A. Introduction

The Planet is the official journal of Sher-E-Bangla Medical College, Barishal and accepts articles for publication from home and abroad. This is a quarterly journal and aims to publish work of the highest quality from all branches of medical science. The aim of the publication is to promote research in Bangladesh and serves as a media for dissemination of scientific information andrecent knowledge among the readers.

B. Categories of Articles:

The journal accepts original research, review articles and case reports for publication.

Original Research:

Original, in-depth research article that represents new and significant contributions to medical science will be accepted. Each manuscript should be accompanied by a structured abstract of up to 250 words using the following headings: Objective, Methods and Materials, Results, Conclusions and Key words. Three to five keywords to facilitate indexing should be provided in alphabetical order below the abstract. The text should be arranged in sections on INTRODUCTION, METHODS 53 and MATERIALS, RESULTS and

DISCUSSION. The typical text length for such contributions is up to 4000 words (including titlepage, abstract, tables, figures, acknowledgments and key messages). Number of references should be limited to 30.

Review Articles:

Review articles will be considered for publication on merit basis. Following types of review articles can be submitted under this category: Newer drugs, new technologies, new management and review of a current concept. The manuscript should not exceed 2500 words (including tables and figures). A review article should include an abstract of up to 200 words describing the need and purpose of review, methods used for locating, selecting, extracting and synthesizing data, and main conclusions. The number of references should be limited to 35.

Case Reports:

Only case reports of exceptional quality will bepublished in the case report format. A case report should have a brief abstract of about 150 words. The text should not exceed 1500 words and is arranged as introduction, case report and discussion. Number of tables/figures should be limited to 3. Reference should include up to 10most recent references of 3 years including current year. The written consent of patient or of the legal guardian for publication must be obtained.

C. Criteria for Acceptance:

All manuscripts should meet the following criteria: the material is original, study methods are appropriate, data are sound, conclusions are reasonable and supported by the data, andthe information is important; the topic has general medical interest; and that the article is written in reasonably good English. Manuscripts which do not follow the guidelinesof Journal “The Planet” are likely to be sent back to authors. All accepted manuscripts are subject to editorial modifications to suit the language and style of “The Planet” Journal and suggestions may be made to the authors by the Editorial Board to improve the scientific value ofthe journal.

D. Editorial Process:

The Planet Journal commits to high ethical and scientific standards. Submitted manuscripts are considered with the understanding that theyhave not been published previously in print or electronic format (except in abstract or poster form) and are not under consideration by another publication or electronic medium. Statements and opinions expressed in the articles published in the Journal are those of the authors and not necessarily of the Editor. Neither the Editor nor the Publisher guarantees, warrants, or endorses any product or service advertised in the Journal. All manuscripts appropriately submitted to the editor in chief of “The Planet” Journal are first reviewed by the Editors. Manuscripts are evaluated according to their scientific merit, originality, validity of thematerial presented and readability. Some manuscripts are returned back to the authors at this stage if the paper is deemed inappropriatefor publication in the “The Planet” Journal, if the paper does not meet the submission requirements, or if the paper is not deemed to have a sufficiently high priority. All papers considered suitable by the Editors for progress further in the review process, undergo peer review by at least two reviewers. If there is anygross discrepancy between the comments of two reviewers, it is sent to a third reviewer. Peer reviewers' identities are kept confidential; authors' identities are also not disclosed to the reviewers. Accepted articles are edited, without altering the meaning, to improve clarity and understanding. Decision about provisional or final acceptance is communicated within 8 weeks.

E. Cover Letter:

The cover letter should outline the importance and uniqueness of the work. It should include the signed declaration from all authors on:

a. Category of manuscript (original research, review article, case report)
b. Statement that the material has not been previously published or submitted elsewhere for publication (this restriction does not apply toabstracts published in connection with scientificmeetings.)
c. Transfer of copyright to the Planet Journal upon the acceptance of the manuscript for publication.
d. All authors have reviewed the article and agreed with its contents.
e. Information of any conflicts of interest (of any) of the authors.
f. Sources of research support, if any, includingfunding, equipment, and drugs.

The cover letter should also include the mailing address, telephone numbers, and e-mail address of the corresponding author.

F. Manuscript Preparation:

The manuscripts should comply with the prescribed guidelines. It should be well organized and written in simple and correct English under appropriate headings. The abbreviations and acronyms should be spelledout when they occur first time.

The Introduction should address the subject ofthe paper. The Methods and Material section should describe in adequate detail the laboratory or study methods followed and statethe statistical procedures employed in the research. This section should also identify the ethical guidelines followed by the investigatorswith regard to the population, patient samples or animal specimens used. A statement should be made, where applicable, that their study conforms to widely accepted ethical principles guiding human research (such as the Declaration of Helsinki) and also that their study has been approved by a local ethics committee. The Results section should be concise and include pertinent findings and necessary tables and figures. The Discussion should contain conclusions based on the major findings of thestudy, a review of the relevant literature, clinicalapplication of the conclusions and future research implications. Following the Discussion, Acknowledgements of important contributors and funding agencies may be given.

a. Title page information

- **Title:** Title should be concise and informative. Titles are often used in information-retrieval systems. Avoid abbreviations in title.

- **Author names and affiliations:** Please clearly indicate the given name (s) and family name (s) of each author and check that namesare accurately spelled. Present the authors affiliation and addresses (where the actual work was done) below the names. Indicate all affiliations with a lower case superscript letter immediately after the author's name and in front of the appropriate address. Provide the e-mail address of each author.

- **Corresponding author:** Clearly indicate whowill handle correspondence at all stages of referring and publication, and also post- publication. Ensure that the e-mail address is given and that contact details are kept up to date by the corresponding author.

b. Abstract:

A concise and factual abstract is required. Theabstract should state briefly the purpose of the research, the principal results and majorconclusions. An abstract is often presented separately from the article, so it must be able to stand alone. References should be avoided. Also, non-standard or uncommon abbreviationsshould be avoided, but if essential they must bedefined at their first mention in the abstract itself.

c. Keywords:

Immediately after the abstract, provide amaximum of 5 keywords. Keywords should be the listed terms in the Medical Subject's Headings (MeSH) of the National Library of Medicine (NLM), available at https:// www.nlm.nih.gov/mesh.

d. Abbreviations:

Abbreviations must be defined within the bracket at their first mention area. Ensureconsistency of abbreviations throughout the article.

e. **Acknowledgements:**

Collate acknowledgements in a separate section at the end of the article before thereferences. List here those individuals who provided help during the research (e.g. providing language help, writing assistance or proof reading the article, etc.).

f. Units:

Follow internationally accepted rules and conventions: use the international system of units (SI). If other units are mentioned, please give their equivalent in SI. Generic rather than trade names of drugs should be used.

g. Figures and graphics:

- For graphics, a digital picture of 300 dpi or higher resolution in JPEG format should besubmitted.
- Figures should be numbered consecutively according to the order in which they have beenfirst cited in the text, if there is more than 1 figure. Each figure should be cited in the text inHindu-Arabic numerals.
- Each figure/illustration should be providedwith a suitable legend below the figure that includes enough information to permit itsinterpretation without reference to the text.
- All photomicrographs should indicate the magnification of the prints.
- When symbols, arrows, numbers or letters areused to identify parts of the illustrations, each one should be explained clearly in the legend.

h. Tables:

Tables should be placed next to the relevant text in the article.

- Number tables consecutively in accordance with their appearance in the text. Each table should be cited in the text in Roman numerals.
- Titles should be brief and a short or abbreviated heading for each column should begiven.
- Explanatory matter should be placed infootnotes and not in the heading.
- Abbreviations in each table should beexplained in footnotes.
- The data presented in a table should not berepeated in the text or figure.

i. References:

References should follow the standards summarized in the NLM's International Committee of Medical Journal Editors (ICMJE). Recommendations for the Conduct, Reporting, Editing and Publication of Scholarly Work in Medical Journals (ICMJE recommendations), available at: http://www.icmje.org/recommendations/. The titles of journals should be abbreviated according to the style used for MEDLINE (www.ncbi.nlm.nih.gov/nlmcatalog/journals). Journals that are not indexed should be writtenin full.

- References should be numberedconsecutively in the order in which they are firstmentioned in the text.
- References in text, tables and legends shouldbe identified by superscript Hindu-Arabic numerals at the end of thesentence outside any punctuation. If several different studies or papers are cited within one sentence, the number should be placed where it will accurately identify the correct study.
- The names of authors in the text should concur with the reference list.
- References cited only in tables or in legends to figures should be numbered in accordance with a sequence established by the first identification in the text of the particular table orillustration.
- In general: All authors/editors should be listedunless the number exceeds six, when you should give six followed by "et al."

G. Policy regarding use of AI: Author must follow

AI usage scenario	Disclosure	Ethically	Remarks
1. Generating research hypotheses	Mandatory	Acceptable if disclosed	Considered *substantial and intentional* use
2. Writing portions of the manuscript	Mandatory	Acceptable if disclosed	Directly impacts originality; must be transparent
3. Collecting or analyzing data	Mandatory	Acceptable if disclosed	AI influences core scientific processes
4. Generating figures or tables (Limited usages. Details stated in section Generative AI Images)	Mandatory	Acceptable if disclosed	Affects interpretation and presentation
5. Modifying/synthesizing patient images	-	Unethical	Serious risk of privacy breach and misrepresentation
6. Citing AI-generated ideas as if original	-	Unethical	Constitutes plagiarism; attribution is mandatory
7. Using AI for grammar correction/sentence refinement	Optional	Acceptable	Provided that human retains content control
8. Restructuring text (e.g., for fluency or clarity)	Optional	Acceptable	No creative authorship; judgment by human remains central
9. Using AI for spell-checking or formatting references	Unnecessary	Acceptable	Routine technical tasks; minimal influence
10. Using AI as a literature search assistant	Unnecessary	Acceptable	Comparable to traditional search engines
11. Using AI to design manuscript structure (outline/framework)	Optional/ Mandatory (context)	Acceptable if disclosed	Transparency in Methods section recommended

H. Submission Preparation Checklist:
As part of the submission process, authors are required to check submission's compliance with all of the following requirements andsubmissions may be returned to authors that donot adhere to these guidelines.

a. The submission has not been previouslypublished elsewhere, is original and has been written by the stated authors.
b. The article is not currently being considered for publication by any other journal and will notbe submitted for such review while under review by “The Planet” Journal.
c. The submission file is in Microsoft Word file format, and the figures are in JPEG format.
d. The text is single-spaced; uses a 12-point font; employs italics, rather than underlining(except with URL addresses); and all illustrations, figures, and tables are placed within the text at the appropriate points, rather than at the end.
e. The text adheres to the stylistic andbibliographic requirements outlined in the Instruction to Authors. Make sure that the references have been written according to the ICMJE Recommendations Style.
f. Spell and grammar checks have been performed.
g. All authors have read the manuscript and agree to publish it.

I. Submission:
Papers should be submitted to the Editor in chief. Three copies of manuscript should be submitted duly signed by all authors with a copyof CD, to:

Prof. Dr. H. N. Sarker
The Editor in chief, The Planet Journal
Professor and Head of the department of Medicine
Sher-E-Bangla Medical College, Barishal Bangladesh.
Papers can also be submitted via the email using the following address:
